

Description

- White
- Eco friendly and safe

Composition

Made on the basis of acrylic resins.

Recommended use

Designed for treatment of different construction surfaces: wood, concrete, brick, stone, plaster and putty. The acrylic concentrate penetrates deep into the weak surface, strengthens and makes it smooth, thus contributing to the economical consumption and easy application of the paint or putty.

Surface preparation

The base surface must be smooth, solid, dry, clean, moisture and oil free.

Application

- Water can be added about 50% of the total concentrate mass.
- Apply with a brush or a roller.
- Apply at air temperature not lower than +5°C .
- Wash the instruments in water when painting is over.
- Dispose of the plastic containers as prescribed by local legislation.

Temperature of the base when applying	from +5°C to +30°C
More precisely, the consumption depends on the smoothness of the surface.	1 l / 10-12 m ²
	5 l / 50-60 m ²
Final drying	3 hours

Sizes available

5liter plastic containers.

Storage

Keep closed, at temperature no less than +5°C for 24 months after the manufacturing date indicated on the container.

Attention

- When working in conditions other than normal, the performances may deviate from the ones indicated above.
- The manufacturer bears no responsibility for working in violation of instructions.
